We need your help

Inspired by a local dentist and friend who is soon to be deployed to Iraq we are collecting letters and drawings from our friends in dentistry, our patients and their families and our own staff. These

letters will be delivered directly to soldiers in the medical hospital where he will be serving.

When we found out he was being deployed again we asked how we could help. He shared the need for letters to help encourage the men and women who are abroad fighting for our great nation. Letters are needed to inspire hope, strength and courage while our soldiers are separated from their loved ones, families, and friends. We are excited to help fulfill this need and are asking your team to join with us to fill this request.

A station has been set up in all 3 of our offices with supplies needed to complete a note or for a child to color a picture. We hope that our patients and their families will take advantage of the opportunity to complete a letter when visiting our office. We are also collecting letters and emails from friends and associates outside the office. These will be included in the packets sent to Iraq.

Feel free to pass this opportunity on to any groups, organizations or other friends and families you feel would like to share their support for our soldiers.

Check out our new Website!

We have recently updated

our website at www.fryorthodontics.com.

We hope that these improvements will help patients and their families quickly access important information about their orthodontic treatment.

New to the site are several Hygiene Videos and a link to Dr. Jeremy's Blog, so feel free to send in your questions!

Also, we now have a MySpace account at www.myspace.com/fryortho and a Facebook link that is listed below. We hope you'll visit both sites and join our group of smiling patients and their families!

We gladly welcome your feedback and suggestions on how we can improve not only our website but any of the services we provide for you. Your ideas help us provide the best orthodontic care possible.
